Thank you for your trust in our practice. As with the transmission of any communicable disease like the flu or a cold, you may be exposed to Covid-19, also known as "coronavirus" at any time or any place. Be assured that we have always followed state and federal recommendations regarding universal personal protection and disinfection protocols to limit any disease transmission and will continue to do so.

Despite our careful attention, there is still a chance that you could be exposed to an infection in our office, just as in a restaurant, the gym, the grocery store or any public place. "Social distancing" nationwide has reduced Coronavirus spread. We have taken measures to enforce social distancing whenever possible, however due to the nature of our practice this is not always possible. Although exposure is unlikely, do you accept the risk and consent to treatment? \*  Yes  No
